CALL FOR PAPERS
14th SWS International Scientific Conference on Arts & Humanities
The Renaissance Reimagined - Arts & Humanities in a New Light
Bologna & Venice, Italy | 12-15 May 2027

Organised by SGEM WORLD SCIENCE (SWS) Scholarly Society.

The conference invites researchers, artists and cultural practitioners to examine historical and contemporary questions across the arts and humanities. Its three connected directions are Arts & Humanities; Medieval & Renaissance Studies; and Humanism, Memory & Cultural Identity. Topics include art history, visual and performing arts, music, architecture and design, history, archaeology, philosophy, literature and languages, cultural heritage, museums and digital humanities.

Oral presentations and poster sessions take place on 12-13 May in Salone delle Feste, I Portici Hotel Bologna - Congress Centre, Via Indipendenza 69, Bologna.

On 14 May, the planned one-day scientific field session in Venice, “The Human Measure - Art, Memory and the Spaces We Share”, asks “Who is heritage for?”. The proposed format combines an approximately 90-minute seminar, selected short contributions and discussion with a shared encounter with Biennale Architettura 2027. A same-day return from Bologna is planned; detailed venue, transport, exhibition-ticket and participation arrangements will be announced as confirmed. A cultural programme in Bologna on 15 May completes the conference.

KEY DATES
Abstracts: 22 March 2027
Workshop/open lesson/art class/case-study proposals: 19 April 2027
Live art, exhibition, musical performance and demonstration proposals: 19 April 2027
Early-bird registration and payment: 19 April 2027
Full papers: 26 April 2027
Poster PDF for conference printing: 29 April 2027
Regular payment: 5 May 2027

Registration is open; participation fees apply (see the official registration information). Contributions are subject to academic review; accepted papers follow the official double-blind peer-reviewed proceedings route. Indexing evaluation does not guarantee inclusion in any particular database.
